

**SUPPORTING
YOUR PROGRESS**
with the latest technology
and expert eye care.

ABOUT

Infigo Eyecare has its genesis stemming from a single-minded aspiration to provide comprehensive eyecare solutions that surpass international standards.

Our team of highly qualified and skilled doctors is dedicated to providing the best-in-class safety, quality and value that meets the needs of our patrons. Our facilities are equipped with the latest German and American technology, are ranked among the best in the world, and are regularly calibrated for the most accurate diagnosis, readings and clinical outcomes. You will find our highly qualified doctors and technicians to be team-centric, patient-focused, and solution-driven.

Since our inception in 2018, we have treated almost 10 lakh patients with the support of our 30 superspecialty doctors and 200 support staff.

MISSION

Our aim is to stand among the very best institutions in the world, offering compassionate and comprehensive eyecare.

We aim to achieve this through cutting-edge technology, service innovation and skilled talent at our warm and patient-friendly facility.

VISION

To be recognised as India's leading and most trusted eyecare delivery system that offers assistance in all specialities of eyecare. We are devoted to innovation and excellence while pursuing a conscious and ethical path.

PHILOSOPHY

To truly revolutionise and democratise the delivery of eyecare for all. This will be achieved by empowering our patients to make informed decisions by providing them with knowledge, and educating them on the various ailments that could concern their eyes.

Our team of doctors is well qualified and skilled to reach an accurate diagnosis, provide the most appropriate line of treatment, with the care that will get the best clinical outcomes. Assuring long-term eye care is in the interest of every patient.

Purpose

At Infigo, our super specialists are focused and available to patients in all areas of subspeciality, bringing their vast experience and knowledge and adding to the volume of speciality care resulting in high-quality and desired clinical outcomes. Good-quality infrastructure driven by state-of-the-art technology to keep up with current healthcare standards is a growing need in the industry. Here at Infigo, we provide exactly that. We enable our skillful and talented doctors with the best so that in turn, they can provide the patients with the best.

Differentiator

Backed by cutting-edge technology and bioscience innovations in the hands of super-qualified surgeons who are committedly engaged to provide you with the best of ophthalmology care across 15* specialities, Infigo Eyecare is the first-of-its-kind comprehensive eye hospital chain with multiple sub specialities under one roof, ensuring the best concern and care.

Values

Our uncompromising approach to eyecare, underpinned by integrity and excellence, assures you that your eyes are in the hands of the most competent and skilled professionals to explore every opportunity for the best clinical outcomes and patient satisfaction.

Doctor Consultation

- Cataract
- Glaucoma
- Corneal & External Eye Disease
- Vitreo-Retina (Diabetic Retinopathy)
- Pediatric and Strabismology
- Oculoplasty & Ocular Oncology
- Cornea & Refractive Surgery

Dispensing

- Optics Advice
- Optical Dispensing
- Contact Lenses
- Lens & Frames
- Sunglasses

Diagnostics

- 3D-OCT
- Refractive Error Evaluation
- Autorefractometry & Keratometry
- Diabetic Retina Work Up
- Computer Eye Disease Work Up
- Fundus fluorescein angiography
- Visual field analysis
- Retina scan

Our Speciality Clinics

- Cataract Micro Surgery
- Cornea & Refractive Surgery
- Vitreo Retina Surgery
- Strabismus & Paediatric Ophthalmology
- Uvea & Ocular Inflammation
- Glaucoma
- Oculoplasty & Ocular Oncology
- Neuro Ophthalmology
- Computer Vision Syndrome
- Contact Lens & Low Vision
- Lasik & Refractive Laser

Your Eye Checkup Will Include

- Computerised Eye Checkup
- Refraction By Digital Phoropter
- Dilated Refraction & Slit Lamp Exam
- Doctor's Consultation
- Fundus Examination & Retina Evaluation
- Scientific Spectacle Dispensing
- Report

SUPER SPECIALITY
SERVICES

CORPORATE EYE CHECKUP

CALL US, AND OUR MOBILE VAN
WILL BE AT YOUR DOORSTEP!

The Indian work model has slowly moved from the farms to the desks, where most individuals spend most of their day in front of a screen. Over time, this incurs a huge detrimental cost on the eyes and if ignored, it may result in serious health consequences.

At Infigo, we tie up with huge corporate structures to provide their talented workforce with holistic eyecare services. We have divided our eye services for the corporates into three parts: Preventive

Eyecare, Maintenance Eyecare and Treating the Diagnosed Disorders. We aim at checking, advising and treating these eyes for simple issues like the Dry Eye Syndrome, reading glasses, and more complex issues like Cataract, Glaucoma, etc. This simple act of a periodical eye checkup can save a lot of employees from serious consequences in the future.

Contact us for more details about our Corporate Eye Checkup Service.

TECHNOLOGY @ ITS BEST

At Infigo we have spared no effort, to ensure that your precious eyes get the care they deserve. Whether it comes about in the form of top-notch specialists in ophthalmology or the state-of-the-art equipment backed by cutting-edge technology the world has to offer. All our equipments are operated by highly trained professionals and maintained up-to-date by internationally certified experts

Phoropter

This instrument is used to test individual lenses on each eye to find out the accurate power for nearsightedness, farsightedness and astigmatism and get an error free eyeglass prescription. Phoropters can also measure Heterophorias (natural resting position of the eyes), accommodative amplitudes, accommodative leads/lags, accommodative posture, horizontal and vertical vergences, and more.

3D OCT (Optical Coherence Tomography)

Our supreme, world's fastest Spectral Domain, 3D OCT allows our patients to experience the state-of-the-art instrument in modern ophthalmology in easier identification and detection of retina abnormalities and glaucoma in early stages and in non-typical patients. The new Revo 3D OCT module expands the precision of your diagnosis with a minimum patients fatigue. Quick and precise evaluation of the condition of the anterior segment is enabled through clinical application in anterior chamber observation. The software automatically recognizes 8 retinal layers which assists with a precise diagnosis and the mapping of any changes in the patient's condition.

OCTOPUS PERIMETRY

Octopus Perimeter gives the systematic measurement of visual field function to detect & monitor the diagnosis of dysfunction in central & peripheral vision which may be caused by increased intraocular pressure which leads to optic nerve damage which further leads to permanent vision loss (glaucoma), stroke, pituitary disease, brain tumors or neurological deficits.

PENTACAM

The PentacamR is a high-resolution rotating Scheimpflug camera system for anterior segment analysis. It provides crisp images of cornea, iris and crystalline lens. It measures the anterior and posterior corneal topography and elevation, total corneal refractive power, corneal power distribution, automatic chamber angle measurement in 360°, chamber depth and volume, HWTW, corneal and crystalline lens optical opacities.

Early Ectasia Detection | Glaucoma Screening | Refractive Screening

Pre- and Postoperative Screening | Planning Cataract Operation | Planning Refractive Surgeries

"E-EYE" DRY EYE SUIT

Dry eye syndrome is a common pathology affecting 15-20% of the population with symptoms increasing with age in modern lifestyle. E-Eye is the first medical device in the world using IRPLR (Intense Regulated Pulsed Light) that has been specifically designed for the treatment of dry eye due to Meibomian Glands Dysfunction (MGD). European-standard, scientifically proven technology provides non-invasive, affordable, and long-lasting results. Quantifies efficiency with 90% satisfaction rates in the first 2 sessions of treatments with affordable costs.

IOL Master

The IOL Master is an advanced, non-invasive technology that takes precise measurements of the eye's curvature and length. These measurements are important to determine which intraocular lens implant will work the best to restore vision after cataract removal. By personalising the lens to the patient's unique eye, the risk of vision problems is minimised, helping achieve the clearest possible sight. The IOL Master test is a key step in the process to ensure the best possible outcome from cataract surgery.

Profile of Our Team And Founders

Our doctors and specialists practice exclusively within the Infigo Eyecare system. Our super specialist surgeons here have been extensively trained at India's premier institutions and are committed to practicing ethically and offering the best clinical care and outcome to every patient.

Infigo Eyecare is part of the Infigo Lifesciences Group, a company founded with a lofty ambition to revolutionise health care through cutting-edge technology, state-of-the-art equipment and highly qualified, top professionals and practitioners.

Infigo Eyecare is part of Infigo Lifesciences, co-founded by Dr. Shridhar Thakur and Anil Kamath, who, between them, share stellar reputations and over 50 years of domain experience in the sphere of comprehensive healthcare. The group plans to open 30 comprehensive speciality eyecare centres in Mumbai and Maharashtra by 2025, before expanding operations nationwide.

Born from a need to fill the void for quality eyecare service at a reachable cost, Infigo Eyecare aspires to be an accountable institution with qualitative and audited clinical outcomes. All our hospitals have a cashless facility and will soon be accredited by the NABH (National Accreditation Board for Hospitals and Healthcare).
